Preface

"Tietorakenteet ja algoritmit" – excercise.

Rypto is a software, which can encrypt and decrypt.

Testing arrangements

Unit testing is done with CUnit framework and gradle.

High-level tests are implemented with a shell script.

Test cases

KeySchedule

The three KeySchedule test cases were obtained from Sam Trenholme's web site http://www.samiam.org/key-schedule.html .

Selected test cases were the following:

- A key with all bits zero.
- A key with all bits one.
- A key with all bytes different.

How to repeat tests
